

BAZ MODELSSM

A.J. SLICK FUEL & HEATING OIL

A.J. Slick, Proprietor

Mod. # BB-002

Thank you for your purchase of
A.J. Slick Fuel & Heating Oil!

We have included many decals and details so the modeler need not search for details to complete the scene. *For best results, please read entire instructions before starting construction.*

INSTRUCTIONS:

- A) Apply pieces with white glue, needle glue applicator, tweezers and a sharp hobby knife.
- B) Remove laser break-off points with hobby knife.
- C) Paint exterior sides of walls, window trims, doors, cat walks, and underside of roof any color you desire.

Diagram 1

- D) Glue walls, tank supports, planks, ladders, overhangs and supports (See Diagram 1).
- E) Install Peel & Stick windows and trim parts. Install clear plastic windows (See Diagram 2).
- F) Examine Example A above, then cut the truck detail parts free with a sharp hobby knife, and wash in soapy water. Let dry completely, then glue together with CA glue. Paint as desired and decal the tank sides as shown in Example B.

Diagram 2

- G) Examine Example C below, then cut the parts free with a sharp hobby knife and assemble with white glue as illustrated. Use the barrier signs printed below as desired by cutting out and gluing in the center of the barrier.

- H) Install black paper inserts inside structure (See Diagram 3).
- I) Glue on roofs, then stick tar paper in courses, from bottom to top (see Diagram 3).
- J) This kit comes with several details that must be prepared or glued before painting. For plastic details scrape, carve, and sand inclusions. Next you must wash with soapy water, and rinse with clean water, then dry completely before painting. Apply tank railing to large tank top with CA glue, then glue tank top to the large tank, with the ladder access oriented 90 degrees to the left of the lower hatch (see diagram 4)
- K) For tanker truck detail (not shown) prep and CA the wheels on, paint and decal.
- L) Assemble 285 gal. fuel tank (See Example D). (wires included to represent filler hoses)
- M) For paint and decal placement, see box shot or apply as desired.
- N) Use your favorite scenery materials for gravel roads, field grass, trees, and more.

We hope you enjoy building this kit as much as we did, The BAZ BoyZ!!!

DOWEL + NEEDLE

Tips: **WORLD'S BEST Z SCALE GLUE APPLICATOR**

Make a needle point glue applicator by drilling a #80 hole in a piece of wood dowel, and use pliers to force the needle eye end into the hole, with a dab of super glue.

Use this tool to apply a thin layer of white glue to all edges that butt up to adjacent pieces for better strength. Also use it to apply glue to the interior walls where tar paper inserts go.
