Advertising Column

Modern style, Era IV-VI

Finely detailed model of the advertising column is made of precisely processed polystyrene and 3D printed parts airbrushed with lacquer paint. The bottom is fitted with double-sided adhesive layer for easy installation on layouts. The column is equipped with white LED (already with resistor) that illuminates the posters from inside.

Scale: Z scale 1:220 **Size:** 20 x 7.2 mm (Height x Diameter)

Quantity: 1 set (**1x** advertising column, **4x** modern posters)

Era: IV-VI **Suitable for:** Z scale 1:220 layouts and dioramas

Power: 8-16V DC (12V DC recommended)

Power consumption: 3 mA @ 12V DC **Cable length:** 150 mm

Installation: ❶ Attach desired poster to the advertising column ❷ Drill 1.5 mm hole in the surface on the layout ❸ Carefully remove protective pad from the bottom of the advertising column ❹ Thread the cables through the hole, affix the column on the surface and gently press on it to increase adhesive force ❺ Connect the cables to the DC power source.

Caution: Please do not connect the device to the AC power source or to the track output (analog or digital).
